## $\Sigma(1670)$ FOOTNOTES

<sup>1</sup> The two MARTIN 77 values are from a T-matrix pole and from a Breit-Wigner fit.

<sup>2</sup> Results are with and without an  $S_{11}$   $\Sigma(1620)$  in the fit.

<sup>3</sup> Ratio only for  $\Sigma 2\pi$  system in  $I = 1$ , which cannot be  $\Sigma(1385)$ .

<sup>4</sup> SIMS 68 uses only cross-section data. Result used as upper limit only.

<sup>5</sup> Assuming the  $\Lambda(1405)\pi$  cross-section bump is due only to  $3/2^-$  resonance.

<sup>6</sup> The CAMERON 77 upper limit on  $F$ -wave decay is 0.03.
