

**$N(2000) \ 5/2^+$**  $I(J^P) = \frac{1}{2}(\frac{5}{2}^+)$  Status: **\* \*****OMITTED FROM SUMMARY TABLE**

Before the 2012 Review, all the evidence for a  $J^P = 5/2^+$  state with a mass above 1800 MeV was filed under a two-star  $N(2000)$ . There is now some evidence from ANISOVICH 12A for two  $5/2^+$  states in this region, so we have split the older data (according to mass) between two two-star  $5/2^+$  states, an  $N(1860)$  and an  $N(2000)$ .
