**$\Lambda(1600)$  DECAY MODES**

| Mode                   | Fraction ( $\Gamma_i/\Gamma$ ) |
|------------------------|--------------------------------|
| $\Gamma_1$ $N\bar{K}$  | 15–30 %                        |
| $\Gamma_2$ $\Sigma\pi$ | 10–60 %                        |

The above branching fractions are our estimates, not fits or averages.
