

**$\Xi(1950)$**  $I(J^P) = \frac{1}{2}(\text{?}?)$  Status: \*\*\*

We list here everything reported between 1875 and 2000 MeV. The accumulated evidence for a  $\Xi$  near 1950 MeV seems strong enough to include a  $\Xi(1950)$  in the main Baryon Table, but not much can be said about its properties. In fact, there may be more than one  $\Xi$  near this mass.

 **$\Xi(1950)$  MASS**
