

**$\Lambda(2085)$**   $7/2^+$  $I(J^P) = 0(\frac{7}{2}^+)$  Status: \*\*

OMMITTED FROM SUMMARY TABLE  
was  $\Lambda(2020)$

In LITCHFIELD 71, need for the state rests solely on a possibly inconsistent polarization measurement at 1.784 GeV/c. HEMINGWAY 75 does not require this state. GOPAL 77 does not need it in either  $N\bar{K}$  or  $\Sigma\pi$ . With new  $K^-n$  angular distributions included, DECLAIS 77 sees it. However, this and other new data are included in GOPAL 80 and the state is not required. BACCARI 77 weakly supports it.
