b-baryon ADMIXTURE (Λ_b, Ξ_b, Ω_b)

NODE=S061

b-baryon ADMIXTURE MEAN LIFE

NODE=S061T

Each measurement of the b-baryon mean life is an average over an admixture of various b baryons which decay weakly. Different techniques emphasize different admixtures of produced particles, which could result in a different b-baryon mean life. More b-baryon flavor specific channels are not included in the measurement.

NODE=S061T

NODE=S061T

b-baryon ADMIXTURE DECAY MODES (Λ_b,Ξ_b,Ω_b)

NODE=S061210;NODE=S061

These branching fractions are actually an average over weakly decaying b-baryons weighted by their production rates at the LHC, LEP, and Tevatron, branching ratios, and detection efficiencies. They scale with the b-baryon production fraction B($b\to$ b-baryon).

NODE=S061

The branching fractions B(b-baryon $\to\ \Lambda\ell^-\overline{\nu}_\ell$ anything) and B($\Lambda_b^0\to\ \Lambda_c^+\ell^-\overline{\nu}_\ell$ anything) are not pure measurements because the underlying measured products of these with B($b\to$ b-baryon) were used to determine B($b\to$ b-baryon), as described in the note "Production and Decay of b-Flavored Hadrons."

For inclusive branching fractions, *e.g.*, $B \to D^{\pm}$ anything, the values usually are multiplicities, not branching fractions. They can be greater than one.

	Mode	Fraction (Γ_i/Γ)	Scale factor	
Γ_1	$p\mu^-\overline{\nu}$ anything	($5.8^{+\ 2.3}_{-\ 2.0}$) %		DESIG=8
Γ_2	$p\ell\overline{\nu}_\ell$ anything	(5.6± 1.2) %		DESIG=9
Γ_3	p anything	(70 ±22) %		DESIG=10
Γ_4	$\Lambda\ell^-\overline{\nu}_\ell$ anything	(3.8± 0.6) %		DESIG=5
Γ_5	$\Lambda\ell^+\nu_\ell$ anything	(3.2± 0.8) %		DESIG=2
Γ_6	Λ anything	(39 ± 7) %		DESIG=7
Γ_7	$\Xi^-\ell^-\overline{\nu}_\ell$ anything	(4.6± 1.4) $\times 10^{-3}$	1.2	DESIG=1

NODE=S061R5

The values and averages in this section serve only to show what values result if one assumes our $B(b \to b\text{-baryon})$. They cannot be thought of as measurements since the underlying product branching fractions were also used to determine $B(b \to b\text{-baryon})$ as described in the note on "Production and Decay of b-Flavored Hadrons."
