

The presence of items on this agenda only indicates that they will be discussed (one day before the Advisory Committee meeting). No assumptions should be made about the outcome of those discussions.

- Literature search issues
- Meson Team issues
- Higgs (how do we handle a particle that has been quasi-discovered?)
- Future developments of detector review (accel.) and balance between detector basics and recent, state-of-the-art developments
- Fits issues
- B Particles, CKM, and Heavy Flavor Averaging Group
- Status and future of HepData

- **Enable Model-independent searches?**
- **Computing Upgrade and New Encoding System**
- **Possibly allow collaborations to enter data?**
- **pdgLive issues – Enable access to archival listings?**
- **PDG Smartphone App – status and future**
- **Possible conversion of book to LaTeX or other options**
- **Future handling of Baryon Resonances**
- **Open Access journals – Our issue is always open access but is that enough?**
- **Add a Cosmology Data Group?**
