Many measurements of $B$ decays involve admixtures of $B$ hadrons. Previously we arbitrarily included such admixtures in the $B^{\pm}$ section, but because of their importance we have created two new sections: “$B^{\pm}/B^0$ Admixture” for $\Upsilon(4S)$ results and “$B^{\pm}/B^0/B^0_s/b$-baryon Admixture” for results at higher energies. Most inclusive decay branching fractions and $\chi_b$ at high energy are found in the Admixture sections. $B^0$-$\bar{B}^0$ mixing data are found in the $B^0$ section, while $B^0_s$-$\bar{B}^0_s$ mixing data and $B$-$\bar{B}$ mixing data for a $B^0/B^0_s$ admixture are found in the $B^0_s$ section. CP-violation data are found in the $B^{\pm}$, $B^0$, and $B^{\pm} B^0$ Admixture sections. $b$-baryons are found near the end of the Baryon section. Recently, we also created a new section: “$V_{cb}$ and $V_{ub}$ CKM Matrix Elements.”

The organization of the $B$ sections is now as follows, where bullets indicate particle sections and brackets indicate reviews.
